Breaker Block

A failed swing that flips to the other side.

Ink.

Bullish breaker

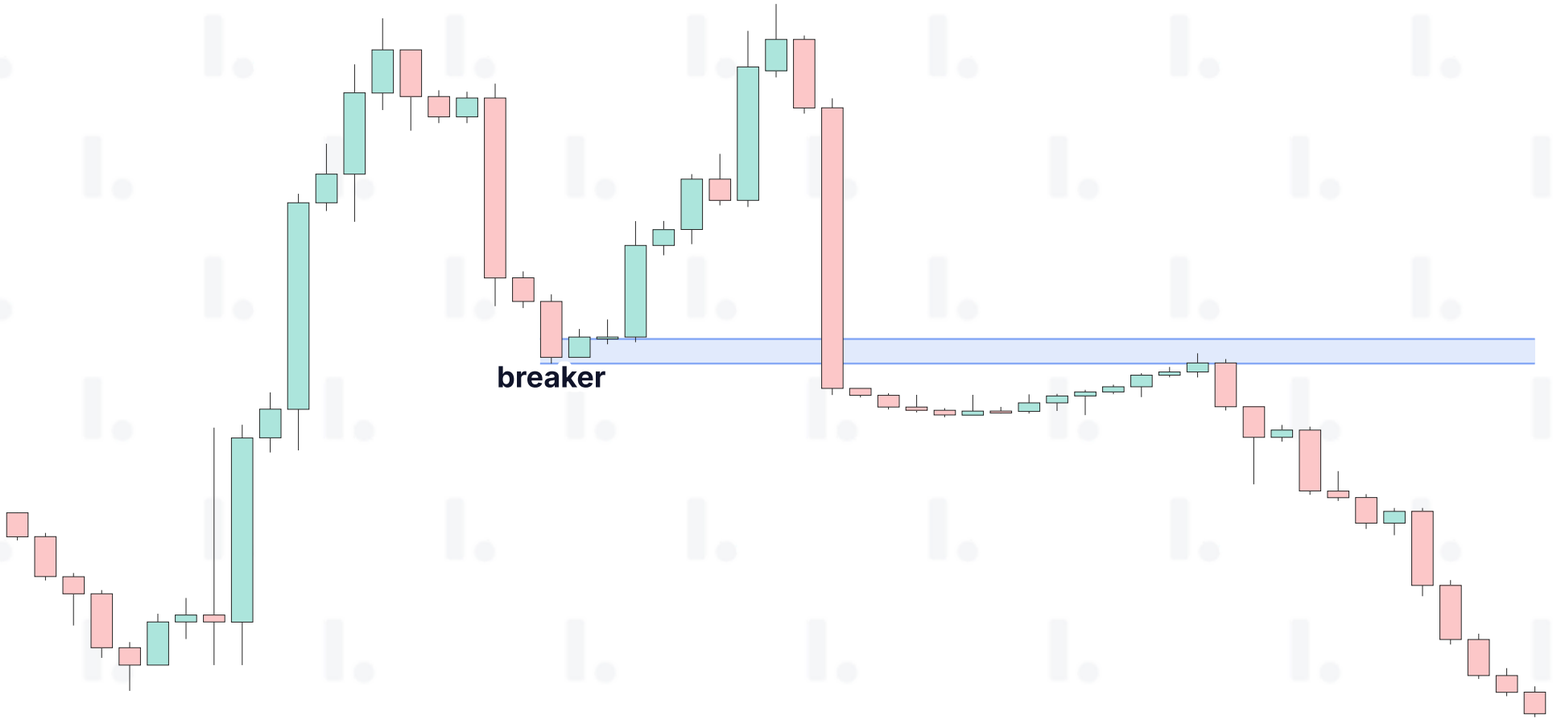

Low, high, lower low

Price makes a low, a high, then sweeps the low. When it closes above that high, the last up candle into the high becomes the breaker.

Buy the return to it.

Bearish breaker

Mirror it

High, low, higher high, then a close below the low. Sell the return to the last down candle.

Breaker rules

1

Needs a sweep

Without the sweep it is a mitigation block.

2

Needs the break

A body close through the swing.

3

Entry

The breaker's range, best with an FVG inside it.

4

Stop

Beyond the sweep low (or high).
