Fair Value Gap

The gap a fast move leaves behind.

lnk.

Three candles

The gap

Candle 2 moves so fast that the wicks of 1 and 3 do not overlap.

The space between is the fair value gap.

Bullish FVG

Buy the return

Price often comes back into the gap, then carries on up.

Stop below candle 1.

Bearish FVG

Sell the return

The same, upside down.

Rules

1

With the trend

Trade gaps in the direction of the move that made them.

2

Fresh is better

The first return to a gap reacts best.

3

Consequent

The gap's 50% line is a common entry.

4

Closed through

A body close through the whole gap turns it into an inversion.
